# Guide to **LEXUS SUVs**

When you're looking to purchase a luxury SUV, you'll have many options to choose from. When you're looking for an SUV that's built from top-of-the-line features, though, Lexus is the first brand to come to mind. After all, these vehicles include premium performance, comfort, technology, and safety features.

However, don't just take our word for it. Lexus has consecutively been named the Kelley Blue Book Best Luxury Brand for the past four years.

To help you decide which one of the five different Lexus SUVs is right for you, this **Guide to Lexus SUVs** eBook was created. We take a closer look at all the features you'll love most about each model. Are you ready to see which SUV is right for you? Keep reading!

## THE RUGGEDLY REFINED LEXUS GX

If you're the type of person who wants to explore the world with all the comforts from home, the 2020 Lexus GX is just what you're looking for. This Lexus SUV can be outfitted with the available Off-Road Package. With this, you'll get several features, such as the Multi-Terrain Select system and Multi-Terrain Monitor.

The **Multi-Terrain Select** system lets you choose between one terrain feature—like loose rock, mud, and sand. Each system automatically makes performance adjustments, so you can tackle nearly any terrain with ease.

How does the **Multi-Terrain Monitor** help you on your off-road excursions? Well, when you're approaching a rock bed, you can switch to the under view, which gives you a live feed of the terrain you're traveling on. The side view display is helpful for maneuvering tight turns.

In addition to off-road capabilities, your 2020 Lexus GX also has all the comfort features you need to feel like you're at home. For example, you'll have an optional three-zone automatic climate control system, which allows you, your front passenger, and your rear-seat passengers to independently set and adjust your temperature settings. That way, everyone can travel in their preferred temperature.

You'll also have a 10-way power-adjustable front seats, which make it possible for you to find the perfect seating position to alleviate fatigue when traveling. Coupled with the optional heated and ventilated seats, you'll feel rejuvenated on even the longest of commutes.

## FAMILY-FRIENDLY LEXUS LX

When you're in the market for a family-friendly Lexus SUV, the 2020 Lexus LX is perfect for you. Why? Well, this SUV has all the space you need as well as the entertainment to keep everyone entertained.

With seating for up to eight passengers, you'll have plenty of space for your whole family or after-school carpools. Plus, you'll also find that everyone can travel comfortably thanks to dimensions spread among front and rear passengers:

	Front Row	Middle Row	Rear Row
<b>Headroom</b>	38.3 inches	38.3 inches	38.9 inches
<b>Legroom</b>	42.9 inches	42.9 inches	34.4 inches
<b>Shoulder Room</b>	61 inches	61 inches	59.1 inches
<b>Hip Room</b>	58.7 inches	58.7 inches	58.5 inches

As you can see, there's more than enough room for everyone to relax comfortably when traveling the town in the Lexus LX.

You and your family can star in your own version of "Carpool Karaoke" thanks to the standard Bluetooth® and optional **Mark Levinson® Reference Surround Sound Audio System**. With this sound system, you'll have 19 speakers strategically placed around the interior of your cabin. No matter where you sit, you'll feel like you're sitting in the front row to at a concert with all your favorite artists.

For those times that everyone wants to be entertained in their own way, you can play your favorite tunes while the kids in the back watch whatever they want on the optional **dual-screen Rear-Seat Entertainment System**.

With this feature, you'll have two seat-mounted LCD screens that are DVD/CD and game console supported. You'll also get a pair of wireless headphones, so no one's entertainment will interfere with one another.

## **SAFETY-FOCUSED LEXUS NX**

When you're looking to travel around town with safety and security on your side, the 2020 Lexus NX is exactly what you're looking for. Why? Well, this Lexus SUV comes standard with the **Lexus Safety System+ 2.0**.

This safety system utilizes smart technology to monitor a range around your SUV to alert you of any potential hazards that you may cross paths with. Let's take a look at the features that are included in this safety package.

### **Pre-Collision System with Pedestrian Detection**

A front-mounted camera constantly scans the area ahead of you to check for vehicles, pedestrians, or cyclists in the daytime that may be too close to your SUV. If a potential hazard is detected, you'll receive an alert. Should there be no reaction to this alert, the system can sometimes automatically apply brake pressure in hopes of avoiding a collision.

### **Lane Departure Alert with Steering Assist**

Using the same front-mounted camera, the position of your marked lane will always be monitored. If the camera detects you've started to drift from your lane, you'll receive an audible and visual warning. This way, you can safely reposition yourself.

In the situation that you don't react to the alerts, the system can step in by providing gentle steering assistance.

## All-Speed Dynamic Radar Cruise Control

This system works similarly to the familiar cruise control, but instead of just keeping a pre-set speed, the All-Speed Dynamic Radar Cruise Control system also keeps a pre-set distance from the vehicle ahead of you. What's even better is that this distance will be kept even if the car ahead of you slows down or comes to a stop.

When it's safe to return to your pre-set speed, your Lexus SUV will do that without you needing to do anything else.

## Lane Tracing Assist

When your All-Speed Dynamic Radar Cruise Control system is enabled, this can help keep your SUV centered in your marked lane.

## Intelligent High Beams

You'll never have to flip back and forth between high beams and low beams when traveling at night thanks to the Intelligent High Beams. With this system, your high beams will enable during night travel, but they'll automatically switch back to low beams when another vehicle is detected.

When the roads are clear again, the high beams will turn on again to provide maximum visibility.

## Road Sign Assist

Second guessing speed limits are a thing of the past thanks to Road Sign Assist. You'll see this information displayed on your driver information system. Signs like speed limits, stop signs, and much more can all be interpreted by this system.

## FUEL-EFFICIENT LEXUS RX

Whether you're doing a lot of traveling for work or you are more environmentally conscious, the hybrid performance of the 2020 Lexus RX is here to help you spend less time at the pump. It's all thanks to the available 3.5L hybrid engine under your hood.

With this engine and the powerful electric motors, you'll have an **EPA-estimated 31 city/28 highway MPG** that makes it possible for you to cruise around town with ease.<sup>1</sup> In addition to the high fuel efficiency, you'll still have plenty of power to help you get around town with ease thanks to the 308 horsepower, all without needing to charge your Lexus SUV.

You'll also have the all-wheel drive (AWD) capabilities on your side, making it possible to travel the town no matter the conditions of the roads. However, this all-wheel drive system isn't like any system you're used to.

Being powered by a hybrid engine, you'll have an available **electronic all-wheel drive system**, too. This lighter weight system creates less friction that would otherwise use up additional fuel. So, with your Lexus RX, you'll travel around town with the most efficiency possible, no matter the conditions of the road.

## THE VERSATILE LEXUS UX

Are you looking for an SUV that can change when you need it to? If so, the 2020 Lexus UX is just what you're looking for. This modern SUV has features that can change your performance abilities, interior, and more at the touch of a button.

To change your performance, you have the standard **Drive Mode Select** system. This system lets you select one of three different drive modes that will automatically make performance adjustments to your overall driving experience:

- **Sport mode:** Select this more an athletic commute. You'll notice changes in your steering, acceleration, and shifting points that makes this feel more like a sports car than a luxury SUV.
- **ECO mode:** Do you want to drive an efficient SUV? If so, ECO mode is perfect for you. It'll make adjustments to your climate settings and throttle response to help maximize efficiency.
- **Normal mode:** Can't decide between Sport and ECO mode? Well, Normal mode is the perfect mix of them both!

On the inside, your Lexus SUV is versatile in its ability to make room for whatever gear you need to bring along for your travels. The Lexus UX comes standard with 60/40 split-folding rear seats. That way, you can fold all the seats down for maximum cargo space, have all seats up for passenger space, or fold into any configuration until you have a healthy mix of passenger and cargo space.

## WHICH LEXUS SUV WILL YOU CHOOSE?

With a handful of different Lexus SUVs to choose from, how are you supposed to just pick one? While our *Guide to Lexus SUVs* eBook is a great starting point, the only real way to decide which model is right for you is to check them out for yourself.

To do that, simply head over to your local Lexus dealer. Here, you'll get an up-close look at each of these SUVs and their exclusive features. You'll also have the chance to take each for a test drive. That way, you'll know for sure which SUV is right for you.

What are you waiting for? Head over to your local Lexus dealer to find the Lexus SUV that's right for you today!

<sup>1</sup>2020 EPA estimates. Actual mileage will vary.
